Fixed or Mobile Time & Attendance (T&A) Solution

Streamlined Workforce Management with Portable, Automated Attendance Tracking

Digital Twin's Mobile Time and Attendance Solution

Managing employee time and attendance across multiple, changing sites can be complex and time-consuming. Digital Twin's Fixed or Mobile Time and Attendance (T&A) solution simplifies this process by providing accurate tracking and streamlined workforce management with maximum flexibility, allowing devices to be easily relocated and moved as required.

Our solution captures precise clock-in and clock-out data while generating comprehensive reports to maintain accurate timekeeping.

With seamless integration into existing payroll systems, the solution reduces administrative workloads, eliminates errors, enhances overall efficiency, and ensures remote monitoring and access from any location or device.

Time and Attendance Devices

In collaboration with ZKTeco, we offer a range of time and attendance tracking devices tailored to your specific needs. From permanent units to portable and industrial-grade options, our devices are designed for easy deployment, relocation, and integration. Additionally, our solution supports integration with existing T&A hardware, offering flexibility and maximizing current investments.

Why Choose Our Solution?

Accurate Workforce Tracking
Automatically capture employees' time and attendance, ensuring accurate reports wherever your workforce is located.

Portable Devices
Portable T&A devices designed for easy relocation, offering flexibility to suit dynamic worksites.

Automated & Customisable Reports
Reports that meet your unique business requirements, aiding in transparent and efficient workforce management.

Payroll Integration
Automated time and attendance reports that easily integrate with existing payroll systems.

Mobile Remote Access
Access T&A data from any location or device and configure devices remotely for real-time oversight, making workforce management more flexible.

Integrated Business Process Rules
Customised and tailored solution that integrates your business process rules to suit specific operational requirements.

Benefits

Improve Workforce Management

Manage your workforce more effectively with real-time attendance tracking and comprehensive mobile-accessible reports.

Decreased Administrative Overhead

Eliminate manual processes and tracking, which in turn increases accuracy, productivity, and efficiency.

Accessibility and Flexibility

With remote access and portable devices, you can monitor attendance data anytime, anywhere, making workforce management more flexible and efficient, regardless of worksite changes.

Biometric Authentication

Prevent time theft and improve employee accountability with biometric authentication.

Key Features

Cutting-Edge Devices

Portable T&A devices that capture real-time data, providing instant insights into employee activity across all sites.

Seamless Integration

Integration with our in-house or existing software over a secure 3G connection.

Custom Business Process Rules

Integrated business process rules to suit operational requirements.

Real-time Monitoring

Track and monitor employees' time and attendance from any device for immediate, real-time insights.

Mobility & Portability

Easily move and transport our T&A devices between locations as your worksites change.

Geofencing for Location Tracking

Track and monitor workforce location via geofencing.
